SUMMARY

BS Information Technology graduate, Cum Laude, and Software Developer with hands-on experience building full-stack web applications using Laravel, React.js, Vue.js, MySQL, and PostgreSQL. Experienced in frontend and backend development, REST API integration, database design, real-time applications, workflow automation, debugging, and deployment. Skilled in developing practical business systems and improving existing applications for usability, reliability, and performance.

SKILLS

Languages: PHP, JavaScript, HTML5, CSS3

Frameworks & Libraries: Laravel, Vue.js, React, Livewire, Inertia.js, Laravel Reverb, Tailwind CSS, shadcn/ui

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Docker, DigitalOcean, VS Code, Linux, REST APIs

EDUCATION

Pampanga State University - Lubao Campus

Aug 2022 - Aug 2026

Bachelor of Science in Information Technology

Cum Laude

Awards: Programming of the Year, Best Presenter

WORK EXPERIENCE

The Firm Consultant Inc.

Software Developer | April 2026 – Present

Software Developer Intern | January 2026 – April 2026

- Develop and maintain business applications using Laravel, React.js, Vue.js, Livewire, MySQL, and PostgreSQL.
- Develop filing, automated BIR form generation, document tracking, queue management, and workflow automation solutions.
- Modernize existing applications by migrating selected Livewire interfaces to Vue.js.
- Implement new features, troubleshoot application issues, and improve existing workflows.
- Collaborate with users and team members to translate business requirements into practical software solutions.
- Perform application testing, debugging, database updates, and deployment support.

PROJECTS

PLCHUB — Capstone Project | Laravel • Livewire • Laravel Reverb • MySQL • DigitalOcean

- Served as the sole developer of a campus social platform featuring real-time chat, voting, advertisements, user following, and a personalized newsfeed.
- Handled the complete frontend and backend development, database design, feature integration, testing, and maintenance.
- Integrated Laravel Reverb for real-time messaging and deployed the application on DigitalOcean.

Filing | Laravel • React.js • PostgreSQL

- Developed a centralized filing system that generates and manages different BIR forms using stored client, company, and filing information.
- Built features for organizing, searching, reviewing, and retrieving generated forms and supporting documents.
- Automated repetitive form preparation processes to improve filing accuracy and reduce manual data entry.

QueueConnect - Queue Management System | Laravel • React.js • Flutter • PostgreSQL • Reverb

- Developed a queue management system integrated with Flutter-based kiosks for ticket generation, customer check-in, and queue processing.
- Built an online appointment platform and administrative interface for managing services, appointments, queues, and customer feedback. Used Laravel Reverb to provide real-time queue updates across the administrative system, kiosks, and queue display screens.
- Implemented online-offline synchronization so local operations can continue during internet interruptions and synchronize data once connectivity is restored.
